

FE-I4 code for emulator, release V1.1

Laura Gonella
Bonn, 29/06/2010

This release has the same functionality of release 1.0, but it uses the definitive version of CMD, EOCHL, and DOB blocks. The register definition is done according to the table in the current version of the document “The FE-I4A Integrated Circuit Guide”.

Please refer to the previous release for more details.
